Subject: Diynamic festival

I would like to add to my objections to the granting of a licence to the Diynamic festival on 8th September in Morden Park as a result of the Eastern Electric festival last weekend.

Despite many reassurances from the organisers of Eastern Electric that they would improve on their performance of last year this was not the case. Despite having a year's lead time and the experience of last year's festival to learn from the impact on the community this year was as bad as last. With such little notice it seems unlikely that Diynamic will be able to prevent these problems.

Although, following pressure from us, there were security barriers and security guards outside the church (as well as a rota of church people from 10:30am-midnight on both days) the public nuisance and crime and disorder just moved across the road to Hatfield Mead and near Morden Primary School.

There was Public Nuisance as men and women urinated and worse in public. There was blatant drug use, with NO capsules littered around the area, many festival goers inhaling from balloons. Broken glass and litter, while cleared from outside the church after a phone call request was everywhere round Hatfield Mead and towards the Harvester. There is little that the organisers can do to regulate behaviour outside the site. Body searches on entry just mean that alcohol and drugs are consumed outside and the empty bottles and capsules are strewn around the surrounding area. Public nuisance of noise – this year the festival could be heard in Cheam, Ewell, Worcester Park, Motspur Park and Sutton. The topography of the park means that it is not necessarily those nearest who are most impacted. The music was barely audible in the church porch (very audible in the Rectory garden) but so loud in Worcester park that a child's birthday party had to be abandoned. Despite assurances that Diynamic sound would be within reasonable limits the unusual sound scape of the park, varying wind and weather conditions and the density of population within a 2 mile radius mean this will be impossible to ensure at such short notice – even given the smaller number of stages. Those most affected by the noise knew nothing about the festival and many were not even within the borough.

Crime and Disorder – NO is illegal to use for recreational use. Many festival goers were blatantly inhaling it. The police have proudly shown how much was confiscated - a value of £10000. A large bagful was deposited in the churchyard and handed to security by one of our volunteer stewards. NO capsules and balloons are the most obvious sign of illegal drug use. There was also a pervasive smell of marijuana along the route to the park. What else? There were numerous traffic violations over the weekend. Speeding cars down London Road, cars stopping on the dual carriageway etc. The police were called to Hatfield Mead following a disturbance. Despite reassurances that there would be a police presence throughout the area we only saw police vans driving around. Again any festival organiser is unable to ensure that criminal activity does not take place outside the site. Even in the small area of Morden where I was stewarding it was clear that if one area was secure the anti-social behaviour and criminal activity just moved elsewhere. Unless all of Morden was surrounded by security barriers and guards it is impossible to guarantee that crime and disorder will not occur as a result of such festivals.

Protection of children from harm – Over the weekend children saw drugs being publicly consumed, adults – men and women - publicly urinating and defecating exposing them to influence that any parent would be unhappy with. The cars speeding down London road put all pedestrians, but particularly

children, at risk of harm. The flats at Hatfeild Mead have no private gardens, so on a summers day the children were outside playing and so witnessed drug taking and dealing, drunkenness and aggression. A man exposed himself to a young child. Children in Morden should not have to experience this! At any festival an excess of drugs and alcohol will be consumed with people behaving badly as a result and so putting children at risk of harm.

Promotion of public safety – If the council is interested in “Promoting” public safety a licence for this festival should be denied. Despite reassurances to the contrary the Eastern Electric festival put public safety at risk this year as much as last year. Fights, speeding, drunkenness, the sheer volume of people in a small area and the use of police who could well have been needed elsewhere put the safety of local people at risk.

I am aware that this is a different festival with different organisers, but any event of this kind will bring similar problems, particularly with such short notice.

Having been assured by the organisers, at the public meeting, that they would contact us immediately to work with us to minimise the impact on our daughter’s wedding, we heard nothing. They had our contact details we did not have theirs. After us contacting the council they finally got in touch. I immediately emailed my reply, but nearly a week later have heard nothing. This makes me dubious about their other promises and conciliatory statements. Words are cheap!

Clare Heath-Whyte

7.8.2018

London Borough of Merton

Your Name: MRS SUSAN LIANG

Your Email address (where possible) [REDACTED]

If you wish to withdraw any representations you have made please notify us as soon as possible.

You are required to give the following information to us by the date specified in the letter:

- 1) Do you intend to attend the hearing? ~~Yes/No~~
- 2) Do you intend to be represented or assisted at the hearing? ~~Yes/No~~
- 3) Do you consider a hearing to be unnecessary? (If all parties agree that a hearing is unnecessary the sub-committee may dispense with the hearing and determine the matter on the basis of the written application, notices and representations) ~~Yes/No~~
- 4) Do you wish to request that any other person(s) be given permission to attend the hearing to assist the sub-committee in relation to the matter under consideration? ~~Yes/No~~

Please give the name(s) of any such person(s) and brief details of the points on which you feel they may be able to assist the sub-committee in relation to the matter under consideration.

POINTS OF OBJECTION:

1) Prevention of Public Nuisance. On 4/5th August 18 at the Eastern Electric Event, Festival goers were openly dealing drugs, urinating, defaecating & vomiting in residential areas, especially Hatfield Wood estate.
- Crime & disorder - see above.

2) Protection of Children - men were openly exposing their genitals in the sight of young children.

3) Public safety - festival goers were so drunk/dugged - cont

Please return this form to Democratic Services, Civic Centre, London Road, Morden SM4 5DX or telephone 020 8545 3616 or email the information to democratic.services@merton.gov.uk

cont - up that they were causing a hazard on London Rd, with waste disposed for their own safety or that of the drivers who had to avoid them.

5) Noise levels after 10pm were totally unacceptable. Morden, as a built-up residential area, is totally unsuitable for these events.

Subject: Event Information Meeting - Music Event, Morden Park, September 2018

Dear member of the local community,

You are receiving this email as a community member of the Morden Park area to invite you to an information evening about a proposed music event, taking place on September 8th 2018.

The aim of the evening is for us to present information to you about the planned event, ourselves as organisers and the timeline on our planning between now and the proposed date. The format will be that we will present information to you, giving you a comprehensive overview of our plans and then we will be able to answer any questions in an open forum style from you.

Our intention is to provide confidence to you that the event will be managed professionally, smoothly and in such a way that any negative impact to the local area is minimised and managed and to discuss any concerns that you may have.

We are hosting the information evening at Merton College on Thursday the 12th of July, starting at 18:30. Ideally, we would have provided more notice to host this evening, however given the short lead time of the event and our need to discuss our plans with you we have taken the earliest opportunity to offer this information evening.

We will make a copy of the minutes and presentation available post meeting to those unable to attend.

To help us plan, if you could please RSVP indicating your attendance, it would be greatly appreciated.

Kind regards,

Festival Production Team | Diynamic Festival – London

INTRODUCTION

THE PEOPLE

MJMK Ltd

Jake Kasumov and Marco Mendes founded MJMK in March 2013. MJMK is a multi faceted events company based in London. MJMK organises independent music parties & festivals under a variety of brands, as well as various types of private and corporate events. Previous venues MJMK has worked with include Battersea Power Station, One Marylebone, and the Dutch Church.

EVENT MANAGEMENT

GoTo Live

Ryan Esson - GoTo Live Director - Responsible for producing events such as Parklife, The Warehouse Project, Festival No. 6, Cotton Clouds, Snowbombing, Jika Jika, Festival Awards, TPI Awards and more around the UK and Europe.

EVENT DETAILS

THE VENUE

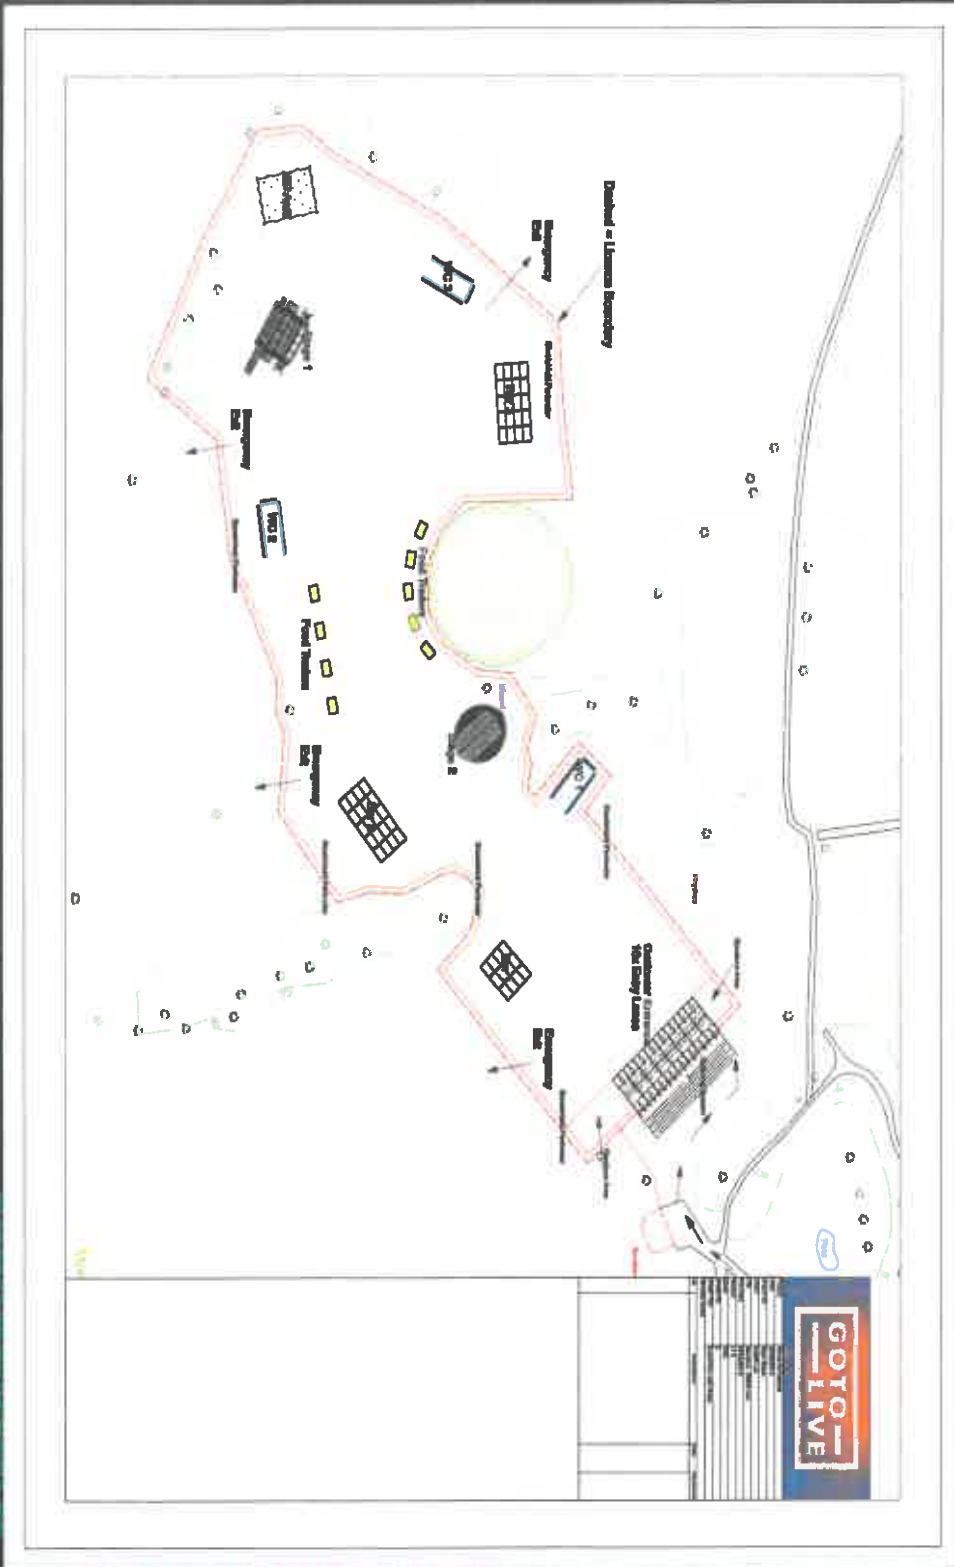

MORDEN PARK
Morden Hall Road
London
SM4 5JD

THE EVENT

- **CAPACITY:** 10,000
- **DATES:**
Build/Break: 03/09/2018 - 10/09/2018
Live: 08/09/2018
- **CURFEW:** 22:00

SITE PLAN

WIDER SITE PLAN

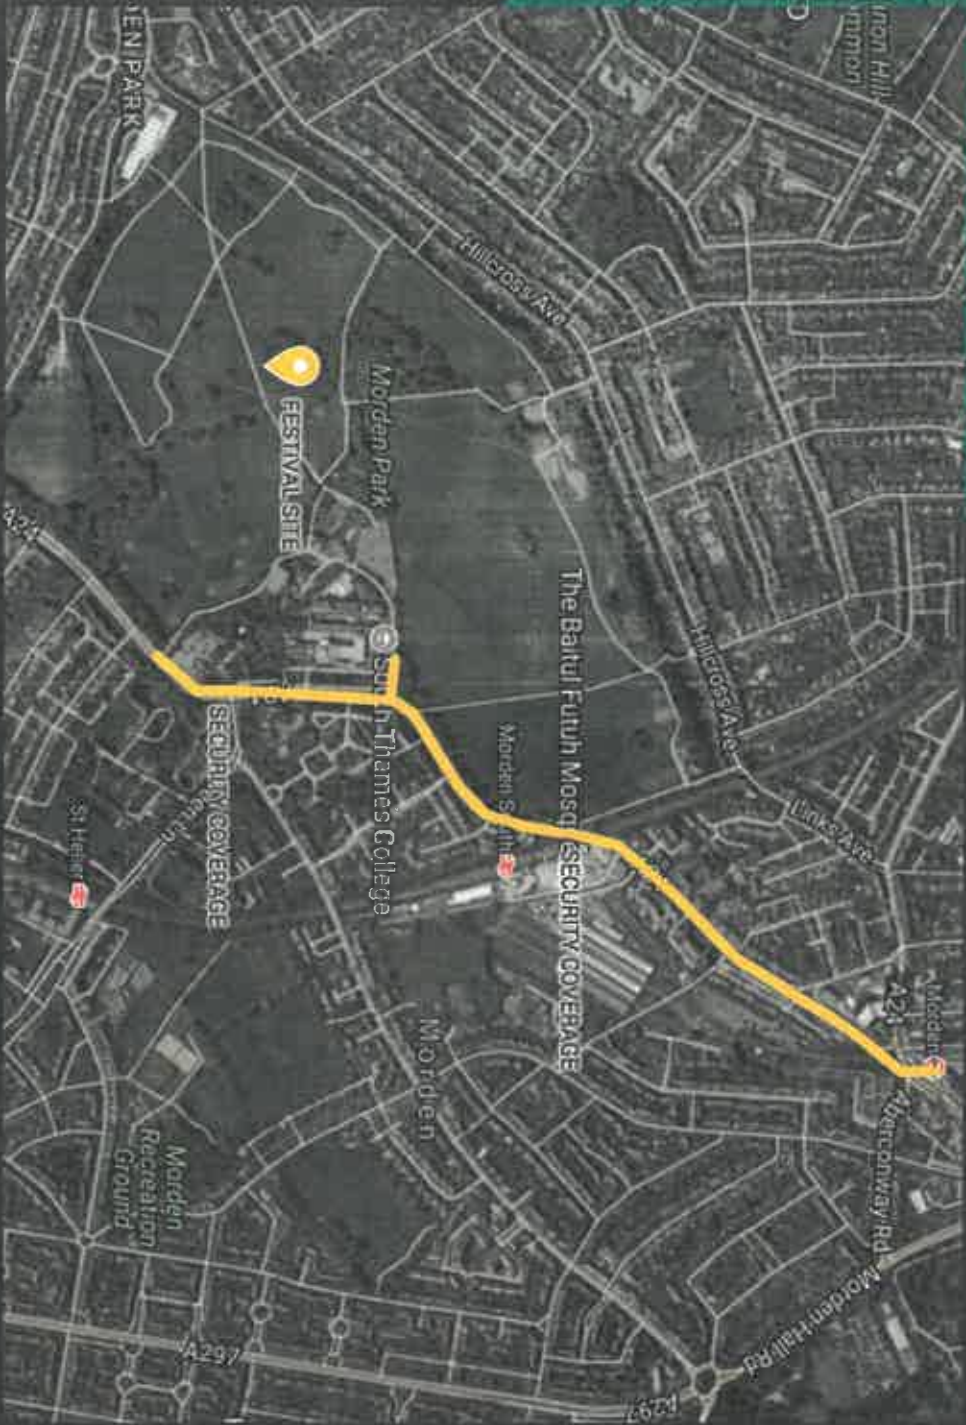

SECURITY PROVISIONS

SHOWSEC

- Showsec have been appointed as the provider of security. They have 30 years of experience in event security and are known to look after some of the biggest events and venues in the UK.
- Provision will be within the park area during build, break and show.
- During the show the footprint will extend beyond between the park and Morden Station and Travel Lodge.
- Provision of security will be substantial and exceed industry guidelines on ratio to audience.

SECURITY PROVISION EXTERNAL

ROADS & HIGHWAYS

- **CPA** specialise in planning and delivering traffic management for events throughout the UK. CPA understand the demands posed by increased pedestrian and vehicular traffic associated with large events, and the traffic management measures that can be implemented to minimise the impact. CPA have extensive experience of operating festivals and events in London.
- A **traffic management plan** will be developed with a focus on the safe ingress and egress of attendees and to reduce the impact of the event on residents.
- The plan will focus on managing the safe dispersal of persons during the egress phase of the event and promote the use of **Morden station**. The plan will also focus on ensuring sufficient provisions are in place for taxis, pick ups and drop offs.

LITTER

- **The festival organisers will engage the services of a professional and experienced waste management company**
- **The company will provision all equipment, staff, disposal and management services around litter and waste**
- **Litter disposal receptacles will be provisioned throughout the event site for the audience to use**
- **Litter receptacles will be provisioned at strategic locations between Morden Station, the approach to the festival site and on pre-entry**
- **The waste management company will operate pre event, throughout the event and post event until loadout is complete**

SANITATION

- Sanitation provision will be by a specialist provider
- The provider are experienced in the provision of toilets for outdoor events of this type
- The quantity of toilet provision will exceed the recommended industry guidance
- A provision of stewarded toilet blocks will be deployed on approach to the site from the station to reduce or remove risk of public urination

NOISE

- **F1 Acoustics** – an experienced acoustic consultancy have been engaged to provide consultancy and noise management services to the event.
- Music noise levels at local resident properties will be agreed with Merton Council as part of the Premises Licence application.
- Music is proposed to be operating on two stages from **11:00 to 22:00**.
- Music noise levels in the local area will be regularly monitored throughout the event by an independent acoustic consultancy who specialise in event sound control.
- A **community hotline** will be set-up so that local residents can contact the event if they have any concerns regarding the event, including noise. All calls will be logged.
- If a complaint about noise is received, the acoustic consultants will be notified and they will measure the music noise levels at the complainants address to verify if the agreed limits are being exceeded.

NOISE

- If the music noise level limits are found to be exceeded at a regular monitoring position or complainant address, actions will be taken as soon as possible to reduce the sound levels at the stage or stages audible at the monitoring position.
- A proactive approach to sound control with regular off-site noise monitoring and on-site sound level adjustment, when necessary, will be undertaken and therefore it will be unlikely that music noise level limits will be exceeded.
- Noise monitoring equipment with a display for sound engineers will be used on-site so that consistent sound levels can be achieved without natural fluctuation over the day. This will also allow sound limits to be set and adjusted as necessary throughout the day at the stages.

COMMUNITY LIAISON

- Our approach is to be accessible as possible to the local community
- We will conduct an **information letter** in advance of the detailing key information and details that the local community will need to know before the event
- The letter will detail final plans on topics discussed this evening including final road and highway management, noise management and soundcheck times
- It will detail the way to communicate with us during the build up, event and breakdown. We will have a dedicated hot line number for issues that cause concern to the local community as well as a dedicated email address
- We commit to hosting a post event feedback session with local community members to allow feedback on the event and community experience

**THANK YOU FOR
ATTENDING AND GIVING
US THE OPPORTUNITY TO
PRESENT OUR PLANS
ANY QUESTIONS?**

Subject: DIY18 Resident Notes

Hi Ryan,

Residents notes from yesterday further from Ludwigs email:

- Church is a grade 1 listed building, had problems in the graveyard with public urination/harassment etc.
- Get back to wedding and start discussion regarding how both events and coincide.
- Worried about punter routes to site – extra signage/toilets.
- Park gate locked and manned for entrance to park (residents)
- Shuttle buses from key locations brought up by a number of residents.
- Concerns about litter picking provisions further than the route to Morden station.
- Community Hotline sent out to residents as for previous events they had nothing through.

Thanks

James

Subject: Residents Meeting Notes

Main Points:

- Issues with wedding happening on the same day of the festival:
 - Multiple mentions of potential fee to be paid
 - Request of extra security allocated to church
 - Comments about council not listening to residents
 - Comments about wedding being booked for a year
 - Comments about terrible experience with EE

- Resident unhappy with EE last year:
 - Drop off/ pick up was a disaster
 - Promises not being kept (litter, security, community liaison)
 - Demographics were incorrect

Security provisions:

- Request to extend security provisions:
 - Lower on A24
 - St Helier train station

- Suggestion to have people come through Links Avenue rather than A24 - less risks of nuisance
- Request to lock and man small residential area in the park near Hillcross Avenue - issues during EE last year
- Suggestion to have buses take people to site from Morden Station

Roads & Highways

- Comments about CPA not getting in touch early enough with car park for EE
- Comments about issues with taxi pick up and drop off at EE

Litter

- Request to extend litter pick up to surrounding areas
- Comments about litter not being cleared after EE
- Charity run taking place next day, concerns about clean-up being successful

Sanitation

- Request to add more urinals and extend the perimeter
- Request to add signage including distance from site, toilets, entry/exit points

Noise/ community liaison

- Comments about information letter and hotline number not being communicated for EE
- Letter to be sent in consultation with council agencies
- Request to set up a post event liaison platform

Joan Hanrahan

Dear Joan,

My name is Will Paterson. I'm working alongside the organisers of the Dynamic Festival.

I would like to invite you a meeting to discuss your concerns and those indicated by other residents.

Please confirm if you can attend a meeting next Thursday 9th August at 630pm at the College?

We previously had the go ahead to host this festival in Greenwich. Unfortunately the landlord had to start building work much earlier than planned. We have a very experienced and capable site team, who were then able to work closely with Merton council to develop the appropriate resources to sustain a show at Morden Park.

Following our meeting with the Police we have an extensive deployment of experienced security operatives planned. They will be spread across the ingress and egress route. We will also have a strict search before allowing customers into the festival site. We will then have security spread across the site and 2 response teams, who will monitor the festival site throughout its operation. We can explain this deployment at the meeting.

We will place Security in the grounds of the Church and the retirement home. The security will have a manager and radios. They will ensure that customers do not enter the grounds of either building. We can discuss the plan for this deployment with you and co-ordinate with your stewards.

We have agreed a Policing presence with the local force.

The customers will be warned by email that Nitrous Oxide canisters are prohibited. We will have signs on the access route warning against their use.

We will have CCTV throughout the site including the queue. The CCTV will be monitored on a large screen by a qualified operative. The Police and Council will have access to this CCTV footage throughout the show.

As part of our traffic plan we will have significant numbers of marshals, stewards and security to ensure that customers are able to migrate to and from the site with minimal impact on the local area. The route will be signposted. All customers will also receive an email prior to the event clearly explaining the best ways to get to the site.

We will set up temporary toilets and urinals across the Ingress and Egress route. We will put up signage throughout the ingress and egress route advertising these toilets. Our independent toilet contractor will be responsible for cleaning and restocking these toilets throughout the day. The Toilets will be mentioned on the guide we send to all customers by email.

We will set up large rubbish bins, split into General Waste and Recycling, across the ingress and egress route.

We will have cleaning staff walking the route and out of the site throughout the day. A fresh cleaning team will then conduct an extensive clean up operation after the egress is complete.

We also have recent, successful experience with organising the traffic plan, toilet facilities and cleaning for other London sites.

We have engaged an experienced and stringent noise consultant, who we have used on other sensitive sites recently. The noise consultant has agreed acceptable sound levels with the council's environmental health team. These levels form the core of the Noise Management Policy. We will discuss this Noise Management Policy in detail with the Council on Monday 6th August. We will then make any amends suggested, so that we have a strong, effective policy. The Noise Management team will work closely with the independent sound company and site manager to design a plan for the sound system. The noise management team will have highly qualified staff on 4 key points on the perimeter. These staff will have state of the art measuring devices to take regular readings. These readings will be recorded and will be available to the Council after the show. The staff will use radios to manage the sound company in the unlikely event of any of the levels being breached. They will ensure that any breach is rectified within 20 minutes.

Further to this general noise policy, our site manager has been in touch with the Church to get more details of the event in the garden, so that we can put in place mitigating measures.

Our site manager will also contact the Registry and Haig Homes.

We are using a compact footprint inside the park, which we have reduced recently, so that the majority of the park remains available to park users. We have experienced staff on duty at the gates to this site throughout the build, the show and the break out of the site. They will gladly answer any queries from local residents. If there is the interest we can also arrange to show a group of residents the site on the Friday - the day before the show - so you can see the seriousness with which the event is operated.

We will have an extensive entrance with a wide range of aisles for the queues. We will have a large number of security to ensure that the search goes smoothly and quickly. We will also have a strong WiFi link, so that the ticket scanning is not interrupted.

I welcome the opportunity to discuss these plans with you in person next week. Alternatively I'm available on email or on the phone to discuss the matter at greater length.

Kind regards,

Will Paterson

Mrs M. Robb

The customers will be warned by email that Nitrous Oxide canisters are prohibited. We will have signs on the access route warning against their use.

We will have CCTV throughout the site including the queue. The CCTV will be monitored on a large screen by a qualified operative. The Police and Council will have access to this CCTV footage throughout the show.

As part of our traffic plan we will have significant numbers of marshals, stewards and security to ensure that customers are able to migrate to and from the site with minimal impact on the local area. The route will be signposted. All customers will also receive an email prior to the event clearly explaining the best ways to get to the site.

We will set up temporary toilets and urinals across the Ingress and Egress route. We will put up signage throughout the ingress and egress route advertising these toilets. Our independent toilet contractor will be responsible for cleaning and restocking these toilets throughout the day. The Toilets will be mentioned on the guide we send to all customers by email.

We will set up large rubbish bins, split into General Waste and Recycling, across the ingress and egress route.

We will have cleaning staff walking the route and out of the site throughout the day. A fresh cleaning team will then conduct an extensive clean up operation after the egress is complete.

We also have recent, successful experience with organising the traffic plan, toilet facilities and cleaning for other London sites.

We have engaged an experienced and stringent noise consultant, who we have used on other sensitive sites recently. The noise consultant has agreed acceptable sound levels with the council's environmental health team. These levels form the core of the Noise Management Policy. We will discuss this Noise Management Policy in detail with the Council on Monday 6th August. We will then make any amends suggested, so that we have a strong, effective policy. The Noise Management team will work closely

with the independent sound company and site manager to design a plan for the sound system. The noise management team will have highly qualified staff on 4 key points on the perimeter. These staff will have state of the art measuring devices to take regular readings. These readings will be recorded and will be available to the Council after the show. The staff will use radios to manage the sound company in the unlikely event of any of the levels being breached. They will ensure that any breach is rectified within 20 minutes.

Further to this general noise policy, our site manager has been in touch with the Church to get more details of the event in the garden, so that we can put in place mitigating measures.

Our site manager will also contact the Registry and Haig Homes.

We are using a compact footprint inside the park, which we have reduced recently, so that the majority of the park remains available to park users. We have experienced staff on duty at the gates to this site throughout the build, the show and the break out of the site. They will gladly answer any queries from local residents. If there is the interest we can also arrange to show a group of residents the site on the Friday - the day before the show - so you can see the seriousness with which the event is operated.

We will have an extensive entrance with a wide range of aisles for the queues. We will have a large number of security personnel to ensure that the search goes smoothly and quickly. We will also have a strong WiFi link, so that the ticket scanning is not interrupted.

We are in dialogue with the organiser's of the charity run on the Sunday and will work tirelessly to assist with the delivery of their show.

I welcome the opportunity to discuss these plans with you in person next week. Alternatively I'm available on email or on the phone to discuss the matter at greater length.

Kind regards,

Will Paterson

Kevin Jackaman

Dear Gillian,

My name is Will Paterson. I'm working alongside the organisers of the Dynamic Festival.

I would like to invite you a meeting to discuss your concerns and those indicated by other residents.

Please confirm if you can attend a meeting at The George Inn / Harvester at 630pm this Thursday 9th August?

Following our meeting with the Police we have an extensive deployment of experienced security operatives planned. They will be spread across the ingress and egress route. We will also have a strict search before allowing customers into the festival site. We will then have security spread across the site and 2 response teams, who will monitor the festival site throughout its operation. We can explain this deployment at the meeting.

We will place Security in the grounds of the Church and the retirement home. The security will have a manager and radios. They will ensure that customers do not enter the grounds of either building.

We will have CCTV throughout the site including the queue. The CCTV will be monitored on a large screen by a qualified operative. The Police and Council will have access to this CCTV footage throughout the show.

As part of our traffic plan we will have significant numbers of marshals, stewards and security to ensure that customers are able to migrate to and from the site with minimal impact on the local area. The route will be signposted. All customers will also receive an email prior to the event clearly explaining the best ways to get to the site.

We will set up temporary toilets and urinals across the Ingress and Egress route. We will put up signage throughout the ingress and egress route advertising these toilets. Our independent toilet contractor will be responsible for cleaning and restocking these toilets throughout the day. The Toilets will be mentioned on the guide we send to all customers by email.

We will set up large rubbish bins, split into General Waste and Recycling, across the ingress and egress route.

We also have recent, successful experience with organising the traffic plan and toilet facilities for other London sites.

We have engaged an experienced and stringent noise consultant, who we have used on other sensitive sites recently. The noise consultant has agreed acceptable sound levels with the council's environmental health team. These levels form the core of the Noise Management Policy. We will discuss this Noise Management Policy in detail with the Council on Monday 6th August. We will then make any amends suggested, so that we have a strong, effective policy. The Noise Management team will work closely with the independent sound company and site manager to design a plan for the sound system. The noise management team will have highly qualified staff on 4 key points on the perimeter. These staff will have state of the art measuring devices to take regular readings. These readings will be recorded and will be available to the Council after the show. The staff will use radios to manage the sound company in the unlikely event of any of the levels being breached. They will ensure that any breach is rectified within 20 minutes.

Further to this general noise policy, our site manager has been in touch with the Church to get more details of the event in the garden, so that we can put in place mitigating measures.

Our site manager will also contact the Registry and Haig Homes.

We will hand over contact numbers for the landline, which will be in operation on the day for any complaints. This landline will be manned throughout and the member of staff will have a radio link to the noise team.

We are using a compact footprint inside the park, which we have reduced recently, so that the majority of the park remains available to park users. We have experienced staff on duty at the gates to this site throughout the build, the show and the break out of the site. They will gladly answer any queries from local residents. Dear David and Vivienne French,

My name is Will Paterson. I'm working alongside the organisers of the Dynamic Festival.

I would like to invite you a meeting to discuss your concerns and those indicated by other residents.

Please confirm if you can attend a meeting at The George Inn / Harvester at 630pm this Thursday 9th August?

We previously had the go ahead to host this festival in Greenwich. Unfortunately the landlord had to start building work much earlier than planned. We have a very experienced and capable site team, who were then able to work closely with Merton council to develop the appropriate resources to sustain a show at Morden Park.

Following our meeting with the Police we have an extensive deployment of experienced security operatives planned. They will be spread across the ingress and egress route. We will also have a strict search before allowing customers into the festival site. We will then have security spread across the site and 2 response teams, who will monitor the festival site throughout its operation. We will explain this deployment at the meeting.

We will place Security in the grounds of the Church and the retirement home. The security will have a manager and radios. They will ensure that customers don't enter the grounds of either building. We can discuss the plan for this deployment with you and co-ordinate with your stewards.

We can extend this security presence to your road to ensure that you do not have difficulties leaving and returning to your property.

We have agreed a Policing presence with the local force.

The customers will be warned by email that Nitrous Oxide canisters are prohibited. We will have signs on the access route warning against their use.

We will have CCTV throughout the site including the queue. The CCTV will be monitored on a large screen by a qualified operative. The Police and Council will have access to this CCTV footage throughout the show.

As part of our traffic plan we will have significant numbers of marshals, stewards and security to ensure that customers are able to migrate to and from the site with minimal impact on the local area. The route will be signposted. All customers will also receive an email prior to the event clearly explaining the best ways to get to the site.

We will set up temporary toilets and urinals across the Ingress and Egress route. We will put up signage throughout the ingress and egress route advertising these toilets. Our independent toilet contractor will be responsible for cleaning and restocking these toilets throughout the day. The Toilets will be mentioned on the guide we send to all customers by email.

We will set up large rubbish bins, split into General Waste and Recycling, across the ingress and egress route.

We will have cleaning staff walking the route and out of the site throughout the day. A fresh cleaning team will then conduct an extensive clean up operation after the egress is complete.

We also have recent, successful experience with organising the traffic plan, toilet facilities and cleaning for other London sites.

We have engaged an experienced and stringent noise consultant, who we have used on other sensitive sites recently. The noise consultant has agreed acceptable sound levels with the council's environmental health team. These levels form the core of the Noise Management Policy. We will discuss this Noise Management Policy in detail with the Council on Monday 6th August. We will then make any amends suggested, so that we have a strong, effective policy. The Noise Management team will work closely with the independent sound company and site manager to design a plan for the sound system. The noise management team will have highly qualified staff on 4 key points on the perimeter. These staff will have state of the art measuring devices to take regular readings. These readings will be recorded and will be available to the Council after the show. The staff will use radios to manage the sound company in the unlikely event of any of the levels being breached. They will ensure that any breach is rectified within 20 minutes.

Further to this general noise policy, our site manager has been in touch with the Church to get more details of the event in the garden, so that we can put in place mitigating measures.

Our site manager will also contact the Registry and Haig Homes.

We are using a compact footprint inside the park, which we have reduced recently, so that the majority of the park remains available to park users. We have experienced staff on duty at the gates to this site throughout the build, the show and the break out of the site. They will gladly answer any queries from local residents. If there is the interest we can also arrange to show a group of residents the site on the Friday - the day before the show - so you can see the seriousness with which the event is operated.

We will have an extensive entrance with a wide range of aisles for the queues. We will have a large number of security to ensure that the search goes smoothly and quickly. We will also have a strong WiFi link, so that the ticket scanning is not interrupted.

When making the decision to downsize to one day we looked carefully at the list of artists so that they still have sufficient space to perform.

I welcome the opportunity to discuss these plans with you in person next week. Alternatively I'm available on email or on the phone to discuss the matter at greater length.

Kind regards,

Will Paterson

Dear David,

My name is Will Paterson. I'm working alongside the organisers of the Dynamic Festival.

I would like to invite you a meeting to discuss your concerns and those indicated by other residents.

Please confirm if you can attend a meeting at The George Inn / Harvester at 630pm this Thursday 9th August?

We previously had the go ahead to host this festival in Greenwich. Unfortunately the landlord had to start building work much earlier than planned. We have a very experienced and capable site team, who were then able to work closely with Merton council to develop the appropriate resources to sustain a show at Morden Park.

Following our meeting with the Police we have an extensive deployment of experienced security operatives planned. They will be spread across the ingress and egress route. We will also have a strict search before allowing customers into the festival site. We will then have security spread across the site and 2 response teams, who will monitor the festival site throughout its operation. We can explain this deployment at the meeting.

I attended Eastern Electrics on Saturday. We would like to pay for the 4 security personnel you enlisted to work at the Church and please do let us know if there are other costs associated with the operation to secure the grounds of the site?

My colleague Ryan, on cc, is, I know, liaising with you about the wedding reception for your daughter and will attend the meeting with me on Thursday.

We went to the Registry on Saturday and will replicate the measures put in place by Eastern. As a guide we will only have 2 sound sources while Eastern had 8, so this will make a marked difference.

We will also be putting security personnel to cover the Haig retirement home.

We have agreed a Policing presence with the local force.

The customers will be warned by email that Nitrous Oxide canisters are prohibited. We will have signs on the access route warning against their use.

We will have CCTV throughout the site including the queue. The CCTV will be monitored on a large screen by a qualified operative. The Police and Council will have access to this CCTV footage throughout the show.

We are in discussions with Merton Council to utilise their CCTV cameras along the Ingress and Egress route.

As part of our traffic plan we will have significant numbers of marshals, stewards and security to ensure that customers are able to migrate to and from the site with minimal impact on the local area. The route will be signposted. All customers will also receive an email prior to the event clearly explaining the best ways to get to the site.

We will set up temporary toilets and urinals across the Ingress and Egress route. We will put up signage throughout the ingress and egress route advertising these toilets. Our independent toilet contractor will be responsible for cleaning and restocking these toilets throughout the day. The Toilets will be mentioned on the guide we send to all customers by email.

We will set up large rubbish bins, split into General Waste and Recycling, across the ingress and egress route.

We will have cleaning staff walking the route and out of the site throughout the day. A fresh cleaning team will then conduct an extensive clean up operation after the egress is complete.

These readings will be recorded and will be available to the Council after the show. The staff will use radios to manage the sound company in the unlikely event of any of the levels being breached. They will ensure that any breach is rectified within 20 minutes.

Further to this general noise policy, our site manager has been in touch with the Church to get more details of the event in the garden, so that we can put in place mitigating measures.

Our site manager will also contact the Registry and Haig Homes.

We went to the Travelodge and Harvester on Saturday afternoon and are liaising with both premises to ensure that things remain comfortable there on the show day.

We are working with TFL and our traffic management company to agree a safe and appropriate Pick Up and Drop Off point. We will be using traffic management stewards and security across the Ingress / Egress route. We walked this route on Saturday and have pinpointed where we would like to deploy security. They will be present from Morden tube station and the town centre and all along the route.

We are using a compact footprint inside the park, which we have reduced recently, so that the majority of the park remains available to park users. We have experienced staff on duty at the gates to this site throughout the build, the show and the break out of the site. They will gladly answer any queries from local residents. Our independent toilet contractor will be responsible for cleaning and restocking these toilets throughout the day. The Toilets will be mentioned on the guide we send to all customers by email.

We will set up large rubbish bins, split into General Waste and Recycling, across the ingress and egress route.

We will have cleaning staff walking the route and out of the site throughout the day. A fresh cleaning team will then conduct an extensive clean up operation after the egress is complete.

We also have recent, successful experience with organising the traffic plan, toilet facilities and cleaning for other London sites.

We have engaged an experienced and stringent noise consultant, who we have used on other sensitive sites recently. The noise consultant has agreed acceptable sound levels with the council's environmental health team. These levels form the core of the Noise Management Policy. We will discuss this Noise Management Policy in detail with the Council on Monday 6th August. We will then make any amends suggested, so that we have a strong, effective policy. The Noise Management team will work closely with the independent sound company and site manager to design a plan for the sound system. The noise management team will

have highly qualified staff on 4 key points on the perimeter. These staff will have state of the art measuring devices to take regular readings. These readings will be recorded and will be available to the Council after the show. The staff will use radios to manage the sound company in the unlikely event of any of the levels being breached. They will ensure that any breach is rectified within 20 minutes.

Further to this general noise policy, our site manager has been in touch with the Church to get more details of the event in the garden, so that we can put in place mitigating measures.

Our site manager will also contact the Registry and Haig Homes.

We are using a compact footprint inside the park, which we have reduced recently, so that the majority of the park remains available to park users. We have experienced staff on duty at the gates to this site throughout the build, the show and the break out of the site. They will gladly answer any queries from local residents. If there is the interest we can also arrange to show a group of residents the site on the Friday - the day before the show - so you can see the seriousness with which the event is operated.

We will have an extensive entrance with a wide range of aisles for the queues. We will have a large number of security to ensure that the search goes smoothly and quickly. We will also have a strong WiFi link, so that the ticket scanning is not interrupted.

I welcome the opportunity to discuss these plans with you in person next week. Alternatively I'm available on email or on the phone to discuss the matter at greater length.

Kind regards,

Will Paterson

Kevin Jackaman

Dear Andrew,

My name is Will Paterson. I'm working alongside the organisers of the Dynamic Festival.

I would like to invite you a meeting to discuss your concerns and those indicated by other residents.

Please confirm if you are able to attend a meeting at The George Inn / Harvester at 630pm this Thursday 9th August?

Following our meeting with the Police we have an extensive deployment of experienced security operatives planned. They will be spread across the ingress and egress route. We will also have a strict search before allowing customers into the festival site. We will then have security spread across the site and 2 response teams, who will monitor the festival site throughout its operation. We can explain this deployment at the meeting.

We will place Security in the grounds of the Church and the retirement home. The security will have a manager and radios. They will ensure that customers do not enter the grounds of either building. We can discuss the plan for this deployment with you and co-ordinate with your stewards.

We have agreed a Policing presence with the local force.

The customers will be warned by email that Nitrous Oxide canisters are prohibited. We will have signs on the access route warning against their use.

We will have CCTV throughout the site including the queue. The CCTV will be monitored on a large screen by a qualified operative. The Police and Council will have access to this CCTV footage throughout the show.

As part of our traffic plan we will have significant numbers of marshals, stewards and security to ensure that customers are able to migrate to and from the site with minimal impact on the local area. The route will be signposted. All customers will also receive an email prior to the event clearly explaining the best ways to get to the site.

We will set up temporary toilets and urinals across the Ingress and Egress route. We will put up signage throughout the ingress and egress route advertising these toilets. Our independent toilet contractor will be responsible for cleaning and restocking these toilets throughout the day. The Toilets will be mentioned on the guide we send to all customers by email.

We will set up large rubbish bins, split into General Waste and Recycling, across the ingress and egress route.

We will have cleaning staff walking the route and out of the site throughout the day. A fresh cleaning team will then conduct an extensive clean up operation after the egress is complete.

We also have recent, successful experience with organising the traffic plan, toilet facilities and cleaning for other London sites.

ABOUT CARPARKAT

CarParkAt specialise in planning and delivering safe and efficient traffic management and parking for events and festivals throughout the UK. With a 12-year history of working with outdoor events, CarParkAt understand the demands posed by increased traffic associated with large events and the measures that can be taken to minimise any impact of event traffic. More information about us can be found via www.carparkat.com

TRAFFIC MANAGEMENT PLANNING

The planning process involves the following stages:

- Establish the objectives of the TMP
- Initial site and route planning
- Influencing site design to satisfy route planning
- Identify any actions required on key routes to the event site
- Preparation of internal and external traffic management plans
- Preparation of contingency planning
- Consultation and development of the TMP

1.3 OVERVIEW

This plan has been developed to establish a framework for the management of transport in connection with a Dynamic Festival London, taking place at Morden Park on the 8th September 2018.

The event is expected to attract up to 8,000 attendees on Saturday 8th September 2018. The event is for day ticket holders only - there is no overnight camping. The event will be operational from 11.00 – 22.00. There is no designated event car park. It is predicted that customers will arrive and depart by public transport or private drop-offs/pick-ups and taxis.

For the purpose of this document the terms traffic and transport are used interchangeably. This document has been informed by HSG 195 'The Event Safety Guide', the Code of Practice for Safety at Street Works and Road works, the Traffic Signs Manual and the Road Safety Good Practice Guide. This document is constantly evolving and aims to adapt to implement improvements year on year.

This TMP examines the challenges posed by the increased number of vehicles and pedestrians attending the event and goes on to detail the provisions in place to ensure any impact on other road users and the local community is minimised.

Provisions include:

- Chapter 8 directional signage for the pick up / drop off point – to encourage use of the designated PUDO point. The AA signs schedule is (to be) attached as appendix 2.
- A clearly signed pedestrian route to and from the event to local Morden stations. The AA signs schedule is (to be) attached as appendix 2.
- The sequencing of key pedestrian crossings to be amended to enable safe pedestrian egress (managed by LSTCC).
- A road closure of the access road to the park to enable the safe ingress and egress of pedestrians to and from the site (with access maintained until 21.00 on the event day).

The document is divided into 3 sections:

- Section 1 | Introduction and Overview
- Section 2 | Traffic and Pedestrian Management Plan
- Section 3 | Conclusion
- Figures and Appendices – Attached as corresponding documents

The site has been designed with the intention of minimising the impact on the local highway and prioritising safety for all site users. A 5-mile per hour speed limit will be in place on site and an on site traffic management plan will be in force. Trained and insured traffic marshals provided by CarParkAt Ltd will implement this plan, in partnership with the AA for all highways signage. Traffic control staff on site will be wearing high visibility uniforms meeting EN 20471 standards and will be connected to event management and security via two-way radios.

It is important to note that while the document reaches a point whereby all the agencies agree to the document, the document and its contingencies must remain flexible to accommodate any changes that may occur during the implementation stage of the plan.

1.4 VENUE

Morden Park is located off the A24, London Road. There is a main park access road from the A24. Morden station (northern line) is 0.9 miles from the site, whilst Morden South (Southern Rail and Thames Link) is 0.6 miles from the site and St Helier's Station (Southern Rail and Thames Link) is 0.6 miles.

1.5 EXTERNAL ROAD NETWORK

The venue is located to the north of the A24, London Rd. Vehicle access is via the A24 London Road and a map of the access points is shown in Appendix 1 Figure 1.

ACCESS NUMBER/CODE	ACCESS FUNCTION	ROAD ACCESS	MANAGEMENT
ACCESS 1	PEDESTRIANS / PUDO / ARTISTS / EMERGENCY ACCESS	A24	CPA
ACCESS 2	PEDESTRIANS	N/A	GTL
ACCESS 3	ARTISTS AND EMERGENCY VEHICLES (TBC)	N/A	CPA
ACCESS 4	PICK UPS AND DROP OFFS	MORDEN PARK ACCESS ROAD	CPA

1.6 TRANSPORT LINKS

The majority of event attendees are predicted to route to the venue from local transport hubs:

- Morden Station, 0.9 miles from the venue
- Morden South Station, 0.6 miles from the venue
- St Heliers Station, 0.6 miles from the venue

The Northern Line serves Morden underground station, with trains from Central London stopping at the Station every 3 minutes on Saturdays (with a Night Tube service every 8 minutes). Morden Underground Station is a 19-minute walk from the event site.

Morden South and St Helier Stations are served by the Thameslink and Southern Rail.

Morden Park is connected to the bus network and is served by the 80, 93 and 154 bus routes.

A number of attendees will route to/from the venue by taxi and private pick-ups & drop-offs. Routes to/from the site are likely to be as follows:

- From the North – A24
- From the South – A232, A24
- From the West – A3, A240, A24
- From the East – A232, A24

2. TRAFFIC MANAGEMENT PLAN

This TMP will continue evolving and later versions issued as required.

2.1 OBJECTIVES

The objectives of this TMP are as follows:

- **Maintenance of public safety**
The primary objective of this plan is to ensure public safety is protected.
- **To minimise disruption to all road users**
This TMP details the provisions being implemented to ensure disruption to road users is minimised.
- **The maintenance of traffic flow to and from the event**
Getting ingress traffic off the local highway network and onto the PUDO site quickly and safely is of primary importance, as is ensuing egress traffic can flow back onto the local highway network without causing any significant impact.
- **Minimising disruption to local residents**
The following traffic and pedestrian management plan will be in operation to minimise disruption to local residents.

2.2 FIGURES

Available as appendices to this document

- Figure 3 | College Car Park (Pick Up and Drop Off)

2.3 EVENT TRAFFIC MANAGEMENT PROVISIONS TO BE IMPLEMENTED

PROVISION	DESCRIPTION	APPENDIX / FIGURE
Event directional signage	A signage schedule has been developed to route taxis and vehicles wishing to pick up / drop off to the designated PUDO area. <i>Please see appendix 2 – the signs schedule (to be added).</i>	Appendix 2
Pedestrian Route Signage	A signage schedule has been developed to route pedestrians to/from the site. <i>Please see appendix 2 – the signs schedule (to be added).</i>	Appendix 2
Re-sequencing of traffic lights (A24)	LSTCC to resequence lights of x3 existing pedestrian crossings on the A24 during egress, to facilitate a safe crossing for larger than normal volumes of people (TBC)	N/A
Road closure for Morden Park Access Road	To enable the safe ingress and egress of pedestrians associated with the event. Access will be maintained for the registry office and the other relevant buildings until 21.00.	Figure 2
South Thames College Car Park (Pick Ups and Drop Offs)	Pick Ups and Drop Offs	Figure 3
Morden Park Car Park	Designated area for artists parking	TBC

2.4 EVENT DAY KEY TIMINGS

Saturday 8 September

TIME	DATE / INFORMATION
	8 SEPTEMBER 2018
08.00	Road Closure for Access Road to Morden Park / Registry office car park installed
11.00	SITE OPENS
11.00	PUDO SITE LOCATION[S] OPERATIONAL
20.00	EGRESS BEGINS
21.00	PEDESTRIAN CROSSINGS TO BE SEQUENCED FOR EGRESS – LSTCC (TBC) ACCESS RESTRICTED / HARD CLOSURE OF MORDEN PARK ACCESS ROAD
22.00	EVENT FINISHES PEAK EGRESS IS PREDICTED FROM 22.00 – 23.00
23.30	Temporary traffic management removed

2.5 INGRESS

Attendees will route to the site via the following modes of transport:

A – TAXIS AND PRIVATE DROP OFFS

Chapter 8 directional signage will be in place to route vehicles dropping off for the event to the designated pick up and drop off area(s). Once in the area the CPA traffic team will route vehicles to the designated drop off point.

PEDESTRIAN MOVEMENT WITHIN PUDO DURING INGRESS

Pedestrian barrier will be in place within the PUDO site to route attendees from the PUDO to footways.

B – PUBLIC TRANSPORT

Morden Underground Station - The Northern Line serves Morden Station, with trains stopping at the station every 3 minutes. Each train has a maximum capacity of 665 passengers (www.tfl.gov.uk) and there are x5 platforms at the station. As such

the number of people who could access the station per hour is 13,300. There are also x5 platforms to be able to disperse people on to. Ingress for the event will be spread over several hours (arrivals likely to start from before 11am to 8pm).

Morden South and St Helier Stations – Thameslink services serve these stations on the Sutton Loop Line. On Saturday an off peak service can be expected with x2 trains per hour.

TfL Buses also serve the aforementioned stations and London Road (80, 93, 154).

STATION / TRANSPORT	OPERATOR	TIMETABLE INFO
MORDEN UNDERGROUND	TfL	EVERY 3 MINUTES
ST HELIER / SOUTH MORDEN	THAMESLINK	X2 TRAINS PER HOUR
BUSES	TfL	REGULAR SERVICE TO LONDON ROAD

C - PEDESTRIAN MANAGEMENT

A team of stewarding and security staff will be in place to manage and route pedestrians to the site from local transport hubs (provided by contractor arranged by the event / GTL).

2.6 PEDESTRIAN ACCESS

Event attendees will route on to the site via the footways leading to the park on the Morden Park Access Road. The signage plan (appendix 2 – to be added) shows the signage to be put in place to support this routing.

2.7 ARTISTS

Artists and other relevant vehicles will be given instructions to reach the site via the Morden Park Access Road and will be directed by stewards. The final location for the artists parking is TBC.

2.8 STAFF

Any arrangements are to be confirmed.

2.9 EGRESS

Peak egress is expected from 22.00 – 23.-00 on 8 September.

A barrier line is proposed to be placed on the Morden Park Access Road maintaining a 4m lane for emergency vehicles, allowing greater space for pedestrians to egress from the site.

A - TAXIS AND PRIVATE PICK UPS

PUDO VEHICLE	OPERATIONAL TIMES	LOCATION	FIGURE
ALL VEHICLES	11.00 – 23.00	COLLEGE CAR PARK	3

B – PUBLIC TRANSPORT

Morden Underground - Northern line trains depart the station towards central London every 3 minutes on a Saturday. Northern Line trains have a capacity of 665 passengers (www.tfl.gov.uk).

Pedestrians routing to Morden and St Helier Stations will be guided by a team of stewarding and security staff, who will be deployed from the venue exit gate to the stations (TBC by GTL). Pedestrian signage to the stations mentioned will be provided.

The Night Tube runs from Morden Underground Station on Saturday's and is expected to be in operation on Saturday 8 September.

The last train from St Helier's station to London Blackfriars on Saturday 8 September is at 23.27. The next stop on the Sutton Loop Line is South Morden station.

TfL Buses are also in operation from London Road (80, 93, 154). 24 hour services run from London Road.

LAST SERVICES PUBLIC TRANSPORT

STATION / TRANSPORT	OPERATOR	TIMETABLE INFO
MORDEN UNDERGROUND	TfL	EVERY 3 MINUTES (8 MINUTES NIGHT TUBE)
ST HELIER / SOUTH MORDEN	THAMESLINK	LAST TRAIN SATURDAY 8 SEPTEMBER: 23.27
BUSES	TfL	24 HOUR SERVICE FROM LONDON ROAD

C - PEDESTRIAN MANAGEMENT

A team of stewarding and security staff (provided by contractor arranged by the event / GTL) will be in place to route attendees from the venue to local transport hubs.

Pedestrian barrier will be used to prevent attendees walking in live carriageways and promote use of footways.

The following traffic management provisions will be put in place to enable safe pedestrian egress:

- i) LSTCC are to re-sequence the existing pedestrian crossing points between the venue and Morden station and St Helier station during peak egress (timings as per this plan), to facilitate safe crossing for larger than normal numbers of pedestrians at the traffic light-controlled junctions. This provision is TBC with LSTCC.

- ii) The proposed closure of the access road to Morden Park is proposed to be in place from 8am and will remain in place for egress to cater for crowds leaving the park. There will be no access from 21.00 – 23.00 (or earlier if deemed safe).

D - PEDESTRIAN ROAD CROSSING POINTS

It is recommended that crossing points should be utilised in a normal manner to ensure traffic flows in the area are not impeded. Staff will hold pedestrians until the sequence allows pedestrians to cross. It is recommended to deploy barrier at each crossing point to reduce uncontrolled pedestrian crossing movements (TBC by GTL). LSTCC will be monitoring the following crossing points remotely:

1. London Road / Chalgrove Road
2. Crown Lane / Crown Road
3. London Road / Morden Court

2.10 EMERGENCY ACCESS

Emergency access is primarily via the Morden Park Access Road (shown in Figure 1). Access for emergency vehicles is to be maintained at all times

2.11 INTERNAL TMP IMPLEMENTATION

Members of the on site traffic control team will be connected via two-way radio. The CarParkAt site manager will be in direct, live communications with the event control via 2-way radio during the event operational hours. The event operates a control and the traffic manager will feed information back to the control room.

2.12 CPA STAFFING POSITIONS

A team of traffic marshals will be deployed around the site to manage traffic in the areas listed in the table on page 6.

In addition to the traffic staff note, a team of security staff and stewards will be in operation to manage pedestrians.

2.13 SIGNAGE PLAN

In accordance with the event safety guide, the signing schedule is critical to the success of the event. Directional signage will be used to route pedestrians to and from the site and to route traffic to the designated PUDO area(s). Signage will also be in place for the green and blue gates.

All signs will be manufactured in accordance with Chapter 8 guidelines. Details of all partner organisations and relevant signage schedules can be found in appendix 2 (to be added).

Signs will be erected in accordance with the New Roads and Street Works Act (1991) and the “Safety at Streetworks and Road Works A Code Of Practice. Where required, National Highway Sector Scheme Qualified Traffic Management Operatives will place out signs on the dates stipulated earlier in this TMP.

SIGNAGE PLAN

SIGN TYPE	DESCRIPTION	INSTALLED	REMOVED
DIRECTIONAL	DIRECTIONAL SIGNAGE FOR TAXIS / PICK UPS AND DROP OFFS AND PEDESTRIANS TO AND FROM STATIONS	TBC	TBC

INTERNAL SITE SIGNAGE

Signage will be in place within the PUDO area, staff and artists parking areas to route traffic safely around the site.

Signage will be mounted on A frame stanchions and where necessary will be weighted to the ground. NRSWA unit 2 trained / chapter 8 / appropriately qualified operatives from CarParkAt Ltd will deploy and remove all on site signage. Alternatively, secured corex signing may be used.

2.14 PERMITS AND APPLICATIONS

N/A at stage of V1 TMP.

2.15 CONSIDERATION OF OTHER LOCAL EVENTS / STREET WORKS

At time of TMP preparation, no other events or street works deemed of the scale that may impact upon this TMP are planned in the area immediately surrounding the event.

Roadworks.org shows no works scheduled over the event live phase on the proximate highways that are likely to impact on the event.

Public.londonworks.gov.uk shows no works scheduled over the event live phase on the proximate highways that are likely to impact on the event.

TfL's track closures (6 month look ahead) document (published 25 July 2018) shows no works that are likely to have significant impact on the transport for the event.

2.16 CONTINGENCY PLANS

BUS STOP / BUS SERVICE NOT AVAILABLE DURING INGRESS / EGRESS	CONTINGENCY PLAN	NOTES
Bus stops / services on London Road	Usage of existing rail (Morden, South Morden, St Helier stations) services and pedestrian routing.	N/A
NOT AVAILABLE DURING INGRESS/EGRESS	CONTINGENCY PLAN	NOTES
Morden Station	Utilisation of existing TfL bus services. Re-routing, supported by security and stewards.	Event control to coordinate response with TfL station staff (Morden)
UNDERGROUND LINE NOT AVAILABLE DURING INGRESS/EGRESS	CONTINGENCY PLAN	NOTES
Northern Line	Utilisation of existing TfL bus services. Re-routing, supported by security and stewards.	Event control to coordinate response with TfL station staff (Morden)

NON COMPLIANCE WITH ROAD CLOSURES		CONTINGENCY PLAN	NOTES
Residential Road Closures	Event control informed. Additional resource deployed as required.		Event control to coordinate a response
VEHICLE ROUTES BECOME BLOCKED		CONTINGENCY PLAN	NOTES
A24 London Road	<p>Event Control to contact TfL (LSTCC) and other agency as appropriate (police).</p> <p>Event communications strategy utilised for messaging regards pick ups and drop offs in particular – encouraging use of public transport (buses / underground).</p>		Event control to coordinate response.
SHOWSTOP / EVENT FINISHING EARLY		CONTINGENCY PLAN	NOTES
Traffic Management Provisions	Event Control to coordinate a response. Traffic Management to remain installed as per egress plan, unless Event Control instruct otherwise.		Event Control to coordinate a response and relay to CPA Traffic Manager. Either implement egress strategy or implement no vehicle movement.

3. CONCLUSION

This TMP details the provisions in place to facilitate the safe ingress and egress of traffic and people associated with the event.

Provisions include:

- An accessible site location serviced by the Northern Line, Southern Rail and Thames Links as well as TfL buses.
- A clearly signed route to/from the event from Morden Station and St Helier's Station for pedestrians
- A designated Pick up & Drop off location
- A barrier and stewarding plan to assist in the routing of event attendees to and from the venue
- LSTCC to support with re-sequencing of pre-existing pedestrian crossings to facilitate safe crossing for larger than normal numbers of pedestrians (TBC)
- Contingency plans as described in this document

This is a working document. Feedback and consultations will take place to enable the development of this plan.

Background on Dynamic Festival Organisers

Jake Kasumov

After graduating from the University of Bristol in 2006 with a degree in Economics Jake started his career in investment banking working for Lehman Brothers. Jake then moved to Abu Dhabi to work for Mubadala, the emirate's main Private Equity fund, before returning to the UK to join the investment banking division of Lloyds Bank.

Marco Mendes

With a degree in Law (SOAS - University of London) and LPC (College of Law), Marco began his career in New York at Real Estate Law Firm Maidman & Mittelman LLP, before moving back to London and joining Bloomberg, where he spent 3 years working in business development.

MJMK Limited

Jake and Marco founded MJMK in March 2013. MJMK is a multi faceted events company based in London. MJMK organises independent music parties & festivals under a variety of brands, as well as various types of private and corporate events. Previous venues MJMK has worked with include Battersea Power Station, One Marylebone, and the Dutch Church.

More information: www.mjmk.co.uk

The Collective MJMK LLP

In 2015, MJMK entered into a Limited Liability Partnership with the Collective a co-living developer based in London. Marco Mendes, Jake Kasumov & Reza Merchant, share a background in hospitality, events and the creation of co-living spaces. The LLP currently own and operate S11 bar, health food cafe, Homegrown, Casa do Frango in London Bridge, and the Belrose, a neighbourhood pub opening in Belsize Park this summer.

Dynamic Festival

Summary of Food and Drink Offering

In the enclosed area of the festival, we will provide a wide range of food traders operated by Feast-it (<https://feast-it.com>) whom are offering us a selection of 10 food truck style traders of which 8 will be focusing on meals and 2 will be focusing on desserts.

The style of food will vary from a selection of savoury both with vegetarian and vegan options as well as some sweet options such as ice creams.

The traders will be dispersed around and close to the main dancing areas to facilitate accessibility as well as in the VIP area. The VIP area located next the the main stage of the event will enclose 2 food traders solely purposed to feed VIP area customers and/or staff. The price of the food will not exceed £10 per items.

The drinks provided at the festival will consist of a range of branded/sponsored bars serving soft drinks, beer (cans only), long drinks and cocktails. We will have 2 main bars located in the main area of the festival. One close the entrance of a size of 20M and one close to the main stage area of a size of 50M both serving the same range of drinks.

Alongside the 2 main bars we are also going to have an airstream caravan style bar provided by sponsors which will serve branded drinks.

The VIP area will hold an additional 3 smaller bars also branded from sponsors that will serve more "high-end" drinks such as cocktails. The price of drinks will lay between £2.50 for water & softs to £5.50 for beers and ciders (cans only) to £6/£9 for single and double long drinks and above for cocktails.
