### Additional information for Agenda Item 5 – Health and Wellbeing Strategy and Refresh 2019-2024

The Following should replace the highlighted data on page 47:

2017 data for GCSE outcomes (the most recent data available) shows a gap of 12.9 between the average Attainment 8 score at GCSE for disadvantaged pupils (41.2) achieving Attainment 8 average score at GCSE and all other pupils groups (54.1). This is higher than the London gap (9.80), but lower and in line with the than national gap (12.83).

### Additional information to be added into the Report for Agenda Item 6 - Routes into Employment for Vulnerable Cohorts

This data should be added in at paragraph 3.6.5, Page 52:

Work has been done cross referencing several databases to verify the information provided by the referring sources.

We can now confirm that 70, (67%), of the 104 candidates referred are Merton residents. Of those 70 Merton residents:

20, (41%), are or were known to YOT

19, (27%), are care leavers.

16, (23%), have SEN, but do not have EHCps

12, (17%), have EHCps

4, (6%), are care leavers with EHCps who are or were known to YOT.

The data cleanse identified a flaw in the formula that converted addresses into Merton wards which accounts for the change in the number of Merton residents declared.

Croydon, Wandsworth, Sutton, Lewisham and Brent residents have benefited from the opportunities sources but not at the expense of Merton residents.
